Starwood Architectural Board
Starwood Subdivision
Aspen, Colorado
Attention: Andrew Simcock

Good Morning Members of the Starwood Architectural Board,

We had the good pleasure of working closely with Mark Noel, your architectural advisor on the Karen Brooks residence located at 602 Eppley Drive and are currently collaborating with him on the Giancarlo Residence at 81 Danielson Drive which is in schematic design.

Not only is Mark a seasoned valley architect with solid experience and insight into this complex profession, but we have found him to be wonderful with communicating, sorting thru the nuances of the many concerns that surface along the way and resolving issues as they arise. He is ideal at interpreting the Starwood guidelines and regulations and working with the design team and neighbors to arrive at workable solutions.

Mark is fair, equitable, offers constructive critique and is fully committed to Starwood, its vision, privacy and homeowners. Many years ago, we worked with Mark's predecessor which was a very challenging experience which resulted in complexities and uncertainties with Mark's guidance being just the opposite.

We here at Studio B Architecture+Interiors enjoy Mark's effectiveness, rationale and perspective and he champions Starwood's continuing vision. We look forward to continuing to work with him both on 81 Danielson and soon, Lot 23-A the Greg+Lisa Wilson Residence which is currently in conceptual design.

Please call me with any inquiries.

All the best,

A handwritten signature in black ink, appearing to read "SL", followed by a stylized signature that includes the letters "RA".

Scott Lindenau, FAIA
Design Principal
